**SCIENCE-BASED TRAUMA INTERVIEWING**

# WHAT IS FORENSIC EXPERIENTIAL TRAUMA INTERVIEWING (FETI®)?

**A:**

Certified FETI® is the founding and governing body of the official Forensic Experiential Trauma Interview, a science and practice-based interviewing methodology informed by the latest research on the neurobiology of trauma and memory.

The Forensic Experiential Trauma Interview (FETI®) provides interviewers with a science-informed interviewing framework that maximizes opportunities for information collection and accurately documents the participant's experience in a neutral, equitable, and fair manner.

### WHO IS FETI FOR (AS A PARTICIPANT)?

Everyone. Absolutely everyone. We treat every participant the same. For example, in the criminal justice arena we use the same interviewing methodology for victims and suspects.

*The impact of Certified FETI is profound; it has transformed the way we interact with victims, witnesses, suspects, and our own staff. This interviewing method results in a depth of information that was previously unmined.*

*Since implementing our FETI training, our officers have enhanced the quality of evidence in their investigations, but even greater than this, we are helping victims become whole again.*

**CHIEF CHARLIE DENNIS**

HANOVER POLICE DEPARTMENT

*Understanding brain science is key. FETI training helps my officers make sense of the way victims and witnesses react to trauma.*

*I believe FETI is essential for every member of service. All NYPD Special Victims Division investigators are required to be trained in FETI before we allow them to interview any victim.*

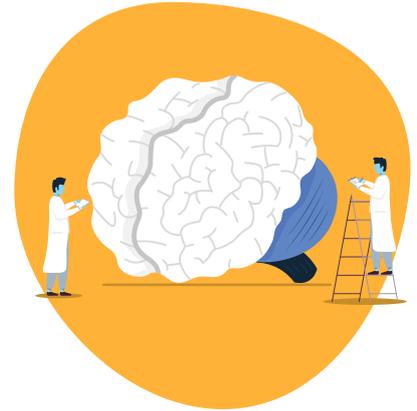

**RETIRED DEPUTY CHIEF  
MICHAEL OSGOOD**

CITY OF NEW YORK POLICE DEPARTMENT

## IT'S ABOUT THE BRAIN.

Brain-based cues give you more information for your investigation.

## TELL ME MORE.

Empathic listening and the FETI methodology unlock experiential details.

*While traditional police interview techniques are geared towards getting information from the prefrontal cortex, FETI teaches officers a methodology that targets the more primitive areas of the brain.*
