WHAT IS FETI?

The Forensic Experiential Trauma Interview is a science and practice-based interviewing methodology informed by the latest research on the neurobiology of trauma and memory.

FETI® provides interviewers with a science-informed interviewing framework that maximizes opportunities for information collection and accurately documents the participant's experience in a neutral, equitable, and fair manner.

Practical Application of the Forensic Experiential Trauma Interview

About the Course

During the Practical Application of the Forensic Experiential Trauma Interview course attendees apply and practice the elements of the FETI Methodology – both as an interviewer and participant of an interview.

This three-day, in-person classroom experience includes live examples of FETI interviews, guided interview instruction and practice, and interactive instructor feedback. Attendees experience and practice actual FETI interviews in front of other attendees who will offer critique facilitated by a Certified FETI Instructor.

All Interview Participants Share Real, Personal Experiences

Each attendee performs the role of interviewee (participant) multiple times during the course, sharing personal experiences chosen at their discretion. Certified FETI instructional courses are unique in that all our interview participants are not distracted with having to role play or memorize created scenarios.

This allows each interview session to more accurately reflect how the FETI Methodology is utilized outside of a training environment and allows each attendee to experience what it is like to be interviewed in this style. Many attendees remark how valuable this part of the course was for them.

PREREQUISITE TO THIS COURSE

The FETI Methodology Course (Online), the Introduction to FETI Course (In-Person) or the Accelerated FETI Course (In-Person) must be completed prior to attending this event.
